## Congratulations!

We would like to congratulate Colegio Normal de Avellaneda and their students for having adopted Cambridge ESOL Young Learners Examinations!

## TKT: Practical in Uruguay

TKT: Practical comes to fill in an existing gap in the Uruguayan English language teaching context, offering candidates who do not have formal certification of their teaching abilities with an internationally recognized teaching award.

In addition, TKT: Practical offers candidates who want to or need to have their practical teaching abilities assessed with a very flexible assessment of lesson planning and teaching skills.

The advantages of TKT: Practical are many:

- It integrates very nicely with TKT: Modules 1, 2 and 3, so it provides institutions and course administrators with a more complete teacher training option including not only a test of knowledge but also an assessment of practical ability;
- It is very teacher-friendly in the sense that candidates can be assessed at the place where they work and while teaching their own students;
- It can be easily adapted to many teaching contexts as it involves assessment of 40 minutes of teaching which can be divided into two teaching sessions of 20 minutes each;
- It requires candidates to fill in a very complete lesson plan template, which will most certainly have a very positive washback effect on them. Candidates will be disciplined to reflect on lesson aims, personal aims, procedure, language analysis, skills development strategies and all kinds of class management decisions while planning their lessons.
